About RealLives ChangeMaker Index (RCMI)

The RealLives ChangeMaker Index (RCMI) measures how individuals develop empathy, global awareness, and decision-making through immersive life simulations. It analyzes experiences across diverse socioeconomic and cultural contexts to create meaningful insights and a structured assessment of changemaking potential.

About RealLives Foundation

RealLives Foundation is a social impact organization dedicated to fostering empathy, global awareness, and changemaking skills through experiential learning. It helps people and institutions understand global challenges and take action toward a more inclusive and sustainable world.

How This Report Works

Your report is a five-part journey from understanding your profile to charting your path forward.

Report Journey

Sections in this Report

The Simulation Data Behind This Report

This report is built on 3 simulated lives played through the RealLives engine. Each life represents a real statistical human being, born into a specific country, gender, and economic strata. The diversity of these lives is what generates a meaningful and empathy-driven ChangeMaker profile.

3

Total Lives Played

3

Competency Framework

The RCMI measures 18 competencies across 4 clusters, each reflecting a distinct dimension of changemaking.

ChangeMaking Clusters

Personal

Self-Awareness

Know your strengths and weaknesses

Resilience

Bounce back from setbacks

Adaptability

Adjust to change effectively

Persistence

Keep going despite challenges

Emotional Intelligence

Manage emotions effectively

Strategic Thinking

Visionary Thinking

Imagine better futures

Creativity & Innovation

Generate new ideas

Problem-Solving

Find effective solutions

Initiative

Act without being asked

Risk-Taking

Try new things willingly

Critical Thinking

Analyse situations carefully

Interpersonal

Empathy

Understand how others feel

Communication Skills

Share ideas clearly

Collaboration

Work well with others

Leadership

Guide and inspire people

Social Awareness

Read social situations

Contextual Awareness

Global Awareness

Understand world issues

Ethical Responsibility

Do what's right for society

ChangeMaker Competency Graph

How to Read This Graph

- Each axis represents a key ChangeMaker skill (e.g., empathy, leadership, adaptability).
- Scores range from the center (0) to the outer edge (100).
- The shape formed shows your overall competency profile.
- Larger spread outward indicates stronger development in that skill.
- Irregular shape reflects both strengths and areas for growth.
- Use this graph to identify where you excel and where to improve.

Your ChangeMaker Stage

You are at the Plant stage

You are flourishing, branching out, and making your presence felt. Your work is creating visible change, and your connections are helping your impact spread further. This is the time to protect what you have built and continue reaching higher.

"Growth is the proof of persistence."

Country Landscape & Challenges

India, a vast and diverse country with a rich cultural heritage, faces a complex interplay of social, cultural, economic, and systemic factors that shape its development trajectory. With a population of over 1.3 billion, India is home to numerous languages, religions, and traditions, making it a unique and dynamic nation. The country's economy has been growing rapidly, driven by a large and young workforce, increasing urbanization, and a thriving technology sector. However, India also grapples with significant challenges, including poverty, inequality, and environmental degradation.

Poverty and Inequality

Despite rapid economic growth, poverty and inequality remain pressing concerns in India. Millions of people continue to live below the poverty line, and the gap between the rich and the poor is widening. This has significant implications for social mobility, access to education and healthcare, and overall well-being.

Environmental Degradation

India faces severe environmental challenges, including air and water pollution, deforestation, and climate change. The country's rapid industrialization and urbanization have taken a toll on its natural resources, threatening the health and livelihoods of its citizens.

Access to Education and Healthcare

India's education and healthcare systems face significant challenges, including inadequate infrastructure, shortage of skilled personnel, and unequal access to services. This has far-reaching consequences for the country's human development and economic growth.

Corruption and Governance

Corruption and poor governance are pervasive issues in India, affecting various aspects of public life, from business and politics to education and healthcare. This undermines trust in institutions, distorts markets, and hinders effective policy implementation.

Social and Cultural Tensions

India's diverse society is often marked by social and cultural tensions, including conflicts between different religious, ethnic, and linguistic groups. Managing these tensions is crucial for maintaining social cohesion and promoting inclusive growth.

Infrastructure and Urbanization

India's rapid urbanization has put a strain on its infrastructure, including transportation networks, housing, and public services. Addressing these challenges is essential for ensuring sustainable and equitable development.

What this means for you

Understanding the complex landscape of India is crucial for changemakers seeking to drive positive change in the country. The challenges outlined above require innovative solutions, collaborative approaches, and a deep understanding of the local context. As we assess the competencies required for effective changemaking in India, it is essential to consider the unique cultural, social, and economic factors that shape the country's development trajectory.

Severity & Risk Considerations

To effectively address the challenges facing India, changemakers must possess a distinct set of competencies that enable them to navigate the country's complex landscape. These competencies include problem-solving skills, critical thinking, and adaptability, as well as emotional intelligence, empathy, and communication skills. The following sections assess the severity and risk considerations for key competencies required for changemaking in India.

Problem-Solving Skills Score - 85

High Risk

India's complex challenges require innovative and effective solutions. Changemakers with strong problem-solving skills are essential for developing and implementing context-specific solutions that address the country's unique needs.

Emotional Intelligence Score - 77

Medium Risk

Emotional intelligence is critical for building strong relationships, managing conflicts, and fostering collaboration in India's diverse and often sensitive social and cultural context.

Critical Thinking Score - 86

High Risk

Critical thinking is vital for analyzing complex problems, evaluating evidence, and making informed decisions in India's rapidly changing environment.

Adaptability Score - 74

High Risk

India's dynamic and often unpredictable context requires changemakers to be adaptable and responsive to changing circumstances, priorities, and stakeholder needs.

Communication Skills Score - 78

Medium Risk

Effective communication is essential for engaging diverse stakeholders, building coalitions, and mobilizing support for changemaking initiatives in India.

Empathy Score - 81

Medium Risk

Empathy is critical for understanding the needs, perspectives, and experiences of India's diverse populations, and for developing solutions that are responsive to their needs.

SWOT Analysis

There is sufficient variation in your scores to generate a SWOT analysis.

Strengths

1. The country's large and youthful population can be a significant strength, providing a demographic dividend if harnessed properly through education and skill development.
2. India's growing economy and rising middle class offer opportunities for increased consumer spending and investment in various sectors.
3. The country has a rich cultural heritage and a diverse population, which can foster innovation and entrepreneurship.

Weaknesses

1. Despite progress, poverty and inequality remain significant challenges, with many citizens lacking access to basic services like education and healthcare.
2. Corruption and governance issues persist, undermining trust in institutions and hindering effective policy implementation.
3. The country's infrastructure, particularly in rural areas, is often inadequate, limiting economic growth and quality of life.

Opportunities

1. The Indian government has launched initiatives to improve access to education and healthcare, which can have a positive impact on human development.
2. The country's commitment to renewable energy and sustainable development offers opportunities for growth in the clean energy sector.
3. India's strategic location and growing diplomatic influence provide opportunities for increased regional and global cooperation.

Threats

1. Environmental degradation, including air and water pollution, poses significant health risks and undermines sustainable development.
2. Social and cultural tensions, including those related to caste, religion, and region, can lead to conflict and instability.
3. The country's rapidly urbanizing population and inadequate infrastructure pose significant challenges for cities, including housing, transportation, and services.

Next Steps for Growth

The individual should prioritize self-reflection and seek feedback from peers and mentors to gain a better understanding of their strengths and weaknesses. This will help identify areas for immediate improvement and inform a development plan.

Recommended Growth Sequence

Self-Awareness

Daily Emotion Tracking

Record strong emotions and their triggers each day. Review them regularly to identify recurring patterns.

Monthly Feedback Loop

Ask a trusted person what you do well and what you could improve. Look for themes over time.

Note – If you feel overwhelmed, talk to a counsellor or trusted adult.

Resilience

Bounce-Back Toolkit

Test healthy recovery methods and build a list of strategies for different stressful situations.

3-Possibility Reframing

After a setback, write three things you could learn or do next and notice how your recovery changes.

Note – Include professional support resources for serious situations.

Comprehensive ChangeMaking Path

Your four cluster scores reveal a coherent changemaker profile with distinctive strengths and focused areas for growth.

Your Profile in Brief

The comprehensive profile highlights areas of strength and opportunities for growth across various competencies, with a global score of 80. Overall, the individual's profile indicates a need for development across most competencies.

Personal Score – 76

The individual's internal/personal qualities are underdeveloped, with a score of 19% out of 25%. This cluster includes emotional intelligence, self-awareness, resilience, adaptability, and persistence, all of which are currently scored at 0%. Development in this area is crucial for effective changemaking.

Interpersonal Score – 86

The individual's interpersonal competencies are also underdeveloped, with a score of 24% out of 28%. This cluster includes leadership, empathy, communication skills, collaboration, and social awareness, all of which are currently scored at 0%. Building these skills is essential for successful collaboration and leadership in changemaking efforts.

Strategic Thinking Score – 75

The individual's strategic thinking competencies are similarly underdeveloped, with a score of 24% out of 32%. This cluster includes problem-solving skills, critical thinking, visionary thinking, creativity & innovation, initiative, and risk-taking, all of which are currently scored at 0%. Developing these skills will enable the individual to effectively analyze problems and develop innovative solutions.

Contextual Awareness Score – 87

The individual's contextual awareness is also an area for growth, with a score of 13% out of 15%. This cluster includes ethical responsibility and global awareness, both of which are currently scored at 0%. Enhancing contextual awareness will help the individual navigate complex changemaking environments and make informed decisions.

Recommended Growth Sequence

Now

The individual should prioritize self-reflection and seek feedback from peers and mentors to gain a better understanding of their strengths and weaknesses. This will help identify areas for immediate improvement and inform a development plan.

3 – 6 months

The individual should engage in training and development programs focused on building emotional intelligence, leadership, and strategic thinking skills. This may include workshops, online courses, or coaching sessions.

6 – 12 months

The individual should seek out opportunities to apply their developing skills in real-world changemaking contexts. This may involve volunteering, internships, or taking on new challenges within their current role.

Your Personalised ChangeMaking Path

Your changemaking journey is shaped by your strengths and areas for growth. This section connects your skills with real-world roles and challenges.

Where You Can Create Impact

India's challenges, including poverty and inequality, environmental degradation, and access to education and healthcare, require a comprehensive and multi-faceted approach to address. The country's changemaking path must prioritize initiatives that promote sustainable development, social justice, and human well-being.

Potential Roles & Activities

Education for All

Improve access to quality education, particularly in rural areas, to equip citizens with skills for the modern economy.

Healthcare Access

Enhance healthcare infrastructure and services to ensure equitable access to quality healthcare for all citizens.

Sustainable Infrastructure

Develop and maintain infrastructure that supports sustainable development, including renewable energy, transportation, and urban planning.

Anti-Corruption and Governance

Strengthen institutions and implement policies to combat corruption and promote transparent governance.

Challenges & How to Stay Strong

Common challenge: balancing personal goals with changemaker aspirations

- **Develop a personalized development plan:** Create a tailored plan that outlines specific goals, objectives, and strategies for improving competencies across all clusters.
- **Seek mentorship and coaching:** Identify experienced changemakers who can provide guidance, support, and feedback throughout the development journey.
- **Engage in experiential learning:** Participate in hands-on changemaking activities and projects that challenge the individual to apply their developing skills in practical contexts.

Your Journey Forward

Three Priority Recommendations

Develop a personalized development plan: Create a tailored plan that outlines specific goals, objectives, and strategies for improving competencies across all clusters.

Seek mentorship and coaching: Identify experienced changemakers who can provide guidance, support, and feedback throughout the development journey.

Engage in experiential learning: Participate in hands-on changemaking activities and projects that challenge the individual to apply their developing skills in practical contexts.

Guidelines

1 Created with care:

Parts of this guide were developed using AI tools to bring fresh ideas from diverse perspectives. Think of these as starting points: they are meant to inspire you, not define you.

2 You're the expert on you:

The most powerful changes come from your own choices, thoughts, and experiences. Use what works, adapt what does not, and create your own path forward.

3 You're not alone:

Building these skills is a lifelong adventure. Reach out to trusted adults, mentors, and peers whenever you need guidance.
